

HONORHEALTH™

Thompson Peak Medical Center

Introduction

- **Thompson Peak Medical Center**, the 2nd smallest in the **Honor Health** network, has 6 ORs
- TPK includes 70 primary and specialty care clinics, a cancer care network, research, and community services

Problem Statement

- The **rising cost of landfill usage** is straining our facility's budget, requiring urgent optimization of waste management.
- We will identify the **root causes of excess waste** and suggest strategies to enhance **recycling and sustainability**

Projected Plastic Diversion

CONTROL PLAN

Pilot Implementation

Training the staff for source separation, baling and collection

Tracking Success Metrics

Measure film plastic **volumes**, landfill **savings** and collection **frequency**

Continuous Improvement

Ensure **long-term sustainability** in film plastic diversion

WHY IS THIS IMPORTANT?

Environmental Responsibility

- Plastic takes up to 500 years to decompose in a landfill
- Recycling helps preserve natural resources
- The amount of new plastic to be produced will decrease
- Mitigate health impact of microplastics
- Prevent plastic pollution
- Saving energy

Cost Savings

COMPANY INFORMATION	
Name	Honor Health
Plastic Pilot Location	Thompson Peak
Baler at Location	No
Incoming pallets / week	50
Trash bag type	55 Gallon Bag
Trash bags / day	214
% of Film Plastic in Trash	35%
Weight of Film Plastic bag	4
Working Days a Week	5
Film Plastic bags / day	75
Film Plastic bags / week	375

END MARKET INFORMATION	
Collection Method	Hauler
Pickup Unit	Full Bale
Collections Cost per Bale	\$38
Rebate per pound	\$0.15

LANDFILL SUMMARY	
Type of Landfill Dumpster	Compactor
Capacity (no. of trash bags)	1,745
Cost per waste pickup	\$480.00
LF Pickup Reduction Yearly	11
Potential Savings	\$5,355

Capital Investment - CAPEX	
Full Size Baler	\$34,000
Conex Box - 20 Foot	\$7,000
Electrical Hookup	\$10,000
Total	\$51,000

Point of Waste Generation						Source Separation		
Point of Waste Generation	Waste Source	Type of Plastic	Volume (lbs)	Frequency	Annual Volume (lbs)	Separation Container	Weight of Container	Annual Container
Warehouse	-pallet wrap	LDPE	63	Weekly	3,250	55 Gallon Bag	4	813
Operation Room	-clothing wrap	LDPE	32	Weekly	1,664	55 Gallon Bag	4	416
	-item wrap							
Housekeeping -includes CSPR	-clothing wrap -item wrap	LDPE	1,404	Weekly	72,982	55 Gallon Bag	4	18,246
			1,498		77,896			19,474

Accumulation				
Accumulation Space	Accumulation Unit	Capacity No of Accum Units	Total Capacity (lbs)	Min Baling Freq (days)
